

## Junior .NET Core Developer (C#)

Bunker Connect, headquartered in Rotterdam, the Netherlands, is the leading digital broker for marine fuels in Europe. This success is powered by our in-house built brokerage platform.

We are looking for a .NET Core developer to help build new features for our platform and refine existing systems.

In this role, you are under direct supervision of our CTO. You should be diligent, attentive, and write clean and readable code. You have an interest to learn about new technologies and sharpen your skills.

### Responsibilities

- Develop new platform features
- Write clean and readable code
- Align your interface with front-end developers
- Give continuous attention to possible improvements
- Update, refactor and debug existing code

### Requirements

- Good command of English
- Experience with C# and SQL (or Entity Framework)
- Diligent attitude and attention to detail
- Knowledge of .NET ecosystem and cloud architecture, such as Azure
- Understanding of event-driven systems
- Education in Computer Science, Engineering or a related field

The developer will work remotely. Candidates are welcome to apply for the job or learn more about the position by contacting us directly on the below contact.
